Claims 1-5, 15 and 17-22 are rejected under 35USC112, first paragraph as being non-enabling for the reasons given in the Office actions mailed 4/4/03, 11/26/03, and 8/13/04.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1,2,4,15, and 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Diamond et al ('237) in view of Knize ('388), further in view of Creegan ('765) and Shepard ('080), further in view of Wilkinson et al ('933), Malmquist ('239), Jones ('867), Pettit et al ('140) and Rayzal ('279) for the reasons given in the Office actions mailed 11/26/03 and 8/13/04.

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 1 above, and further in view of Saunders ('774) for the reasons given in the Office action mailed 4/4/03.

All of applicants' remarks filed 2/16/05 have been fully and carefully considered but are not found to be convincing. It is urged that the Office action's holding that the specification is non-enabling is not well founded. This urging is not convincing since it is based on an inaccurate reading of the Office action. The claims are rejected under 35USC112. As fully detailed previously, the specification discloses subject matter in regard to structural, dimensional and functional relationships necessary to achieve the disclosed objective, which subject matter is omitted from the claims and is thus not

enabled by the disclosure. Without the relationships previously discussed, urgings relative to such issues as absorbing more pressure than Diamond et al, are directed to limitations not found in the claims. On page 9 of the amendment, it is urged that the concavity of the claim is somehow different from that of Diamond. This purported difference is not seen. Diamond shows a concavity formed inwardly of the inwardly formed raised portions.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven L. Weinstein whose telephone number is 571-272-1410. The examiner can normally be reached on Monday-Friday from 7:00AM to 2:30PM.
